## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 52 and 55 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5646705 A (705).**

705 teaches a pixel 51 with slits (the holes 52 across either a row or a column make-up one slit) wherein the slits have boundaries (the pixel electrode 55 formed between each hole 52). Regarding claim 55, the electrode is formed completely around the slits and therefore is inherently wider than the slits.

### *Allowable Subject Matter*

Claims 38-39 and 42-51 are allowed.

Claim 53 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

See new grounds of rejection.
